Alex developed the Hyper Cafe over a 3-month period alongside other projects in his Tapei based workshop. The first stage of the build was the most dramatic since it involved dispensing of the Hypermotard's iconic angular bodywork. Alex then took his hammer to sheet metal and began shaping an entirely new look for the Ducati.

The Hyper Cafe - Cowboy's Chopper Hypermotard cafe racer

(Redirected from Ducati HyperMotard) The Ducati Hypermotard is a supermotard Ducati motorcycle designed by Pierre Terblanche and was first seen at the November 2005 EICMA trade show in Milan. The Hypermotard was awarded "Best of Show" at EICMA and has since won other show awards.

Motorcycle

Royal Enfield's famous motor - 'made like a gun' - hints at the factory's origins, but few appreciate that it is the oldest motorcycle manufacturer in existence that can boast of continuous production. In addition, its famous Bullet can claim the longest motorcycle production run of all time. Greg Pullen charts the rise, fall and rise again of Royal Enfield, from the company's pre-motorcycle beginnings in Redditch, through the impact of two World Wars, the importance of exports to India and subsequent establishment of factories there, to changes in ownership, recently launched models and new concept bikes for the future. With 190 colour photographs, this book includes: the V-twins, from the 1930s K and KX range to a glimpse of the concept V-twin shown in 2018; the singles, from 2-strokes to side-valve 4-strokes, and the ohv version that first used the Bullet name, through to the new singles built in India. The British Bullet: its arrival in 1948 and production in the UK, the original orders from India and subsequent setting up of production there are discussed. The 250s, (1958-68), including the Turbo Twins, and the big twins, from the 1948 500 Town to the final interceptor in 1970, including the 800cc prototype and the Clymer Indians are covered. The new twins: the 650cc Royal Enfield interceptor and Continental GT twins and the Bobber concept bike are discussed. Competition success is covered, with notable ISDT achievements, star rider Johnny Brittain and racing the big twins, and Geoff Duke in the GP5. Finally, the British factories and the new opportunities with the Indian factories are remembered.

Popular motorcycle journalist and author Mark Zimmerman brings a comfortable, conversational tone to his easy-to-understand explanations of how motorcycles work and how to maintain them and fix them when they don't. This practical tutorial covers all brands and styles of bikes, making it a perfect companion to the owner's service manual whether you need to use the step-by-step instructions for basic maintenance techniques to wrench on your bike yourself or just want to learn enough to become an informed customer at your local motorcycle service department. This book includes more than 500 color photos and a thorough index to make it an especially user-friendly reference for home motorcycle mechanics of all skill levels.

Why do all cultures, distant and diverse, have similar tales of dragons? Universal wisdom confirms dragons have interacted with people since time immemorial—they call to us, pique our curiosity, and arouse our fears. These mystical beasts are real and their power, their influence, and especially their magick can be captured. Building upon rituals and drawing on their energy, learn to befriend these inspirational creatures and become partners with them on a spiritual journey. Move with them, learn from them, dance in perfect human/dragon syncopation. Praise: “A unique, one-of-a-kind tome and a welcome addition to the growing body of metaphysical lore.”—Midwest Book Review “A personal devotion and an academic work of the highest order.”—The Dragon Chronicle (UK) “Dragon-lovers everywhere will like this book.”—Prediction

Dragon

The only biography of its kind, Lincolnomics narrates The Great Emancipator’s untold legacy as The Great Builder of American infrastructure—developer of an economic ladder to democracy through national transportation, public education, and market access Lincoln’s view of the right to fulfill one’s economic destiny was at the core of his governing philosophy—but he knew no one could climb that ladder without strong federal support. Some of his most enduring policies came to him before the Civil War, visions of a country linked by railroads running ocean to ocean, canals turning small towns into bustling cities, public works bridging farmers to market. Expertly appraising the foundational ideas and policies on infrastructure that America’s sixteenth president rooted in society, John F. Wasik tracks Lincoln from his time in the 1830s as a young Illinois state legislator pushing internal improvements; through his work as a lawyer representing the Illinois Central Railroad in the 1840s; to his presidential fight for the Transcontinental Railroad; and his support of land-grant colleges that educated a nation. To Lincoln, infrastructure meant more than the roads, bridges, and canals he shepherded as a lawyer and a public servant. These brick-and-mortar developments were essential to a nation’s lifting citizens above poverty and its isolating origins. Lincolnomics revives the disremembered history of how Lincoln paved the way for Eisenhower’s interstate highways and FDR’s social amenities. With an afterword addressing the failure of American infrastructure during the COVID-19 pandemic, and how Lincoln’s policies provide a guide to the future, Lincolnomics makes the case for the man nicknamed “The Rail Splitter” as the Presidency’s greatest builder.

The incredible true story of Tiger Woods’s dramatic comeback following his humbling and very public personal, physical, and professional setbacks. One publicly imploded marriage. Two car accidents. Eight surgeries. And now, a miracle of hard work and storied talent: five Masters wins. Once hailed as “the greatest closer in history” before he fell further than any beloved athlete in America’s memory, Tiger swung at the world’s wildest expectations and beat the skeptics with his April 2019 Masters championship. Roaring Back traces his road to Augusta and the improbable, phenomenal comeback of one of the greatest golfers in history. New York Times–bestselling author Curt Sampson details the highs and lows of Woods’s career in three gripping acts. From his startling loss at the 2009 PGA Championship, detrimental obsession with his swing, and that infamous night involving an ex-wife and a nine-iron...to adoring fans and lucrative sponsors turning their backs, exclusive interviews with past instructors and PGA tour peers, and an arrest complete with a toxicology report . . . finally to Tiger coming from behind for his fifth green jacket as the crowd rumbled in Georgia, and how his comeback rivals those of the most dramatic in his sport. Sampson also places Woods’s defeats and triumphs in the context of historic comebacks by other notable golfers like Ben Hogan, Skip Alexander, Aaron Silton, and Charlie Beljan, finding the forty-three-year-old alone on the green for his trajectory of victory against all odds. As this enthralling book reveals, Tiger never doubted the perseverance of the winner in the mirror. “Sampson admirably details all the highs and lows.” —Jim Nantz, CBS Sports

New in paperback! The Triumph Speed Twin & Thunderbird Bible reveals the definitive history of two of Triumph’s most popular motorcycles in the 40s and 50s. From development history to sporting achievements, this book is packed with detailed information – everything an owner or would-be owner of one these classic twins needs!

Triumph

"Information Technology for Management" by Turban, Volonino, and Wood engages students with up-to-date coverage of the most important IT trends today. Over the years, this leading IT textbook had distinguished itself with an emphasis on illustrating the use of cutting edge business technologies for achieving managerial goals and objectives. The 10th Edition continues this tradition with coverage of emerging trends in Mobile Computing and Commerce, IT virtualization, Social Media, Cloud Computing and the Management and Analysis of Big Data along with advances in more established areas of Information Technology.
