An enterprise is using Messaging to integrate applications.. What will the messaging system do with a message it cannot deliver? When a messaging system determines that it cannot or should not deliver a message, it may elect to move the message to a Dead Letter Channel.. The specific way a Dead Letter Channel works depends on the specific messaging system's implementation, if it provides one ...

Resources, events, agents (REA) is a model of how an accounting system can be re-engineered for the computer age. REA was originally proposed in 1982 by William E. McCarthy as a generalized accounting model, and contained the concepts of resources, events and agents (McCarthy 1982).. REA is a popular model in teaching accounting information systems (AIS), but it is rare in business practice.
