The guidance intends to support public procurement practitioners (also called public buyers or procurement officers) in dealing with EU-funded contracts for the procurement of works, supplies and services as set out in Directive 2014/24/EU of the European Parliament and of the Council of 26 February 2014 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts (see Table 1. below).

Public procurement guidance for practitioners

The Guidelines offers information related to the Tendering Procedures, its implementation in practice, issues and cases faced during daily work, as well as solutions or opportunities to find such solutions. The Guidelines describes the tendering and contractual environment and covers the most common forms

Large international construction projects often have a range of major contractors, subcontractors and consultants based in different parts of the world and working to different legal theories and understandings. This can lead to confusion in the understanding, interpretation and execution of the construction contract, which can result in significant disruption to the construction project. International Construction Contract Law is written for anyone who needs to understand the legal and managerial aspects of large international construction projects, including consulting engineers, lawyers, clients, developers, contractors and construction managers worldwide. In 18 chapters it provides a thorough overview of civil law / common law interrelationships, delivery methods, standard forms of contract, risk allocation, variations, claims and dispute resolution, all in the context of international construction projects. Highly practical in approach – it introduces legal analysis only when absolutely essential to understanding, the book also contains a range of useful appendices, including a 10-language basic dictionary of terms used in FIDIC forms.

These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. NOTE: This replaces Standard Prequalification Document: Procurement of Works (September 1999), Stock no. 14601 (ISBN 0-8213-4601-6).

In September 1999, FIDIC introduced its new Suite of Contracts, which included a “ new ” Red, Yellow, Silver and Green forms of contract. The “ new ” Red Book was intended to replace the 1992 fourth edition of the Red Book, with the ambition that its use would cease with time. This ambition has not materialised and is unlikely to do so in the future. Despite the importance of the 1999 Forms, there has been very little published on the new concepts adopted in them and how they interact with the previous forms. This important work considers these aspects together with the many developments affecting the fourth edition of the Red Book that have taken place since 1997, when the second edition of this book was published, and relates them to key contracting issues. It is written by a chartered engineer, conciliator and international arbitrator with wide experience in the use of the FIDIC Forms and in the various dispute resolution mechanisms specified in them. Important features of this book include: • background and concepts of the various forms of contract; • a detailed comparison of the wording of the 1999 three main forms, which although similar in nature; it nevertheless significantly differs in certain areas where the three forms diverge due to their intended purpose; • analysis of the rights and obligations of the parties involved in the contract and the allocation of risks concerned; • a range of ‘ decision tree ’ charts, analysing the main features of the 1992 Red Book, including risks, indemnities and insurances, claims and counterclaims, variations, procedure for claims, programme and delay, suspension, payments and certificates, dispute resolution mechanisms, and dispute boards; • a much enlarged discussion of the meaning of “ claim ” and “ dispute ” and the types of claim with a discussion of the Notice provision in the 1999 forms of contract for the submission of claims by a contractor and by an employer; • the FIDIC scheme of indemnities and insurance requirements; and the methods of dispute resolution provided by the various forms of contract; and • five new chapters in this third edition, the first four chapters deal with each of the 1999 forms and the fifth chapter is confined to the topic of Dispute Boards.

FIDIC contracts are the most widely used contracts for international construction around the world and are used in many different jurisdictions, both common law and civil law. For any construction project, the General Conditions of Contract published by FIDIC need to be supplemented by Particular Conditions that specify the specific requirements of that project subject to the relevant laws. FIDIC Contracts in Asia Pacific provides readers with detailed guidance and resources for the preparation of the Particular Conditions that will comply with the requirements of the applicable laws for a number of the jurisdictions in which FIDIC contracts are used. The laws that apply to the governing law of the contract, construction works and dispute resolution in each jurisdiction are identified. This book offers chapters on the FIDIC Conditions of Contract for Underground Works, and the perspective of a bilateral aid agency on the use of FIDIC contracts. Each jurisdiction features an outline of its construction industry and information on the impact of Covid-19 on both the execution of construction projects and the operation of construction contracts. This book is essential reading for construction professionals, lawyers and students of construction law using FIDIC contracts.

In 1999, a suite of three new conditions of contract was published by FIDIC, following the basic structure and wording harmonised and updated around the previous FIDIC Design-Build and Turnkey Contract (the 1992 ‘ ‘ Orange Book ’ ’). These conditions, known as the ‘ ‘ FIDIC rainbow, were the Conditions of Contract for: 1 Construction, the so-called Red Book, for works designed by the Employer 1 Plant and Design-Build, the so-called Yellow Book, for works designed by the Contractor 1 EPC/ Turnkey Projects, the so-called Silver Book, for works designed by the Contractor. The first is intended for construction works where the Employer is responsible for the design, as for per the previous so-called Red Book 4th Edition (1987), with an important role for the Engineer. The other two conditions of contract are intended for situations when the Contractor is responsible for the design. The Plant and Design-Build Contract has the traditional Engineer while the EPC/ Turnkey Contract has a two-party arrangement, generally with an Employer ’ s Representative as one of the parties.

This book is explained and covered, but not limited, the followings; • The content of the tender invitation package. • How to evaluate the bids technically and commercially. • The Concepts of a contract. • The elements of enforceable contract. • Types of Contracts. • Allocating liability and risk in contracts. • The Contract Management tasks and responsibilities. • Explain FIDIC contract forms. • Discuss the risk spectrum in construction. • Gives in Chapter 3, seven attachments form samples of different materials needed in contracts. The book is useful tool to whom are working in supply chain management and contracts departments, this book has been prepared to provide practical guidance in general terms in relation to various public services, it is not a legal textbook but practical guidance tool for business.
