Marshall/Johnston's Marketing Management, 2e has taken great effort to represent marketing management the way it is actually practiced in successful organisations today. Given the dramatic changes in the field of marketing, it is a sure bet that the job of leading marketing manager's contributions to the organisation and its customers, clients, and partners has changed at the same level. Yet, no marketing management book on the market today fully and effectively captures and communicates to students how marketing management is really practiced in the 21st century business world. Clearly, it is time for an updated approach to teaching and learning within the field. Marketing Management 2e is designed to fulfill this need.

The fifth edition of Marketing Strategy and Management builds upon Michael Baker's reputation for academic rigor. It retains the traditional, functional (4Ps) approach to marketing but incorporates current research, topical examples and case studies, encouraging students to apply theoretical principles and frameworks to real-world situations.

Concise yet comprehensive, this practical guide covers the critical role of the account planner in advertising. The new edition of Advertising Account Planning features several new topics as well as deeper content in existing areas based on feedback from students, instructors and practitioners.

This work shows how the various elements of consumer analysis fit together in an integrated framework, called the Wheel of Consumer Analysis. Psychological, social and behavioural theories are shown as useful for understanding consumers and developing more effective marketing strategies. The aim is to enable students to develop skills in analyzing consumers from a marketing management perspective and in using this knowledge to develop and evaluate marketing strategies. The text identifies three groups of concepts - affect and cognition, behaviour and the environment - and shows how these they influence each other as well as marketing strategy. The focus of the text is managerial, with a distinctive emphasis on strategic issues and problems. Cases and questions are included in each chapter.
