In addition, because of the lack of available hospital beds in the region, Fondazione Adele e Cav. Francesco Lonati, a Lonati family charity, together with Korian, has made available ten single rooms at the RSA Vittoria hotel to help Ospedale Civile in this emergency and gifted the paediatric emergency department with every 120 FFP3 protective masks that it could find.

Advanced Knitting Technology provides complete coverage of the latest innovations and developments in knitting technology, including emerging methods as well as the latest best practice for classical processes. Many technologies can be used for the production of cloth such as weaving, knitting, nonwoven, and braiding. Knitting methods are being selected for a growing range of applications due to the spectacular properties of knitted fabric, such as softer tactile quality, higher stretchability, bulkiness, and functional properties that compare favorably with other woven fabrics. Beyond the well-known apparel applications, specially designed knitted structures are uniquely suitable for high performance applications like reinforcement for composites, medical implants, and geotextiles. This book presents recent advances in knitting technology, including structures, properties and applications of knitted fabrics in modern apparel,
